Worktools – for a better day at work

What would it take to give you a better, more productive day at work? How could we help you unlock your full potential and do what you do better? These are the simple questions that drive everything we do at Steelcase. You will find that our range of **Worktools** provides some effective answers.

The intelligent solutions featured in this brochure are designed to make your workspace healthier, more organised and better connected, so that you can perform at your very best. We truly hope that these pages inspire you **to have a better day at work.**

Let's be honest. The human body is not designed for sitting at a desk all day long and typing at a keyboard or holding a phone while staring at a computer screen. But that's how many of us spend the average workday. To make things worse, we often adopt postures that put extra strain on various tension zones in the body. That's why one of the primary goals of our Worktools range is to maximise your ergonomic comfort.

The importance of good working conditions. It's just a fact that daily strain on the body's tension zones – through bad posture, for example – can result in **health problems over the longer term**. The same goes for strain on the eyes through bad lighting or improper computer screen distance, which can also cause regular headaches. A glance at corporate statistics reveals that a significant level of **absenteeism** is caused by ailments which are directly **linked to a lack of ergonomic comfort at the workplace**.

Worktools help. Worktools are designed to give you a healthier day at work. From solutions for **improving workstation ergonomics** – like an adjustable monitor arm, keyboard support or footrest – to better desk lighting and more convenient telephone headsets.

Ergonomics at the workstation

Our Worktools range is designed to optimise posture, screen height and distance and lighting to **minimise strain on the body's tension zones and on the eyes**. All our worktools are based on the European Display Screen Directive 90/270/EEC and its recommendations.

Lighting

Inadequate lighting can cause eye fatigue, a major cause of discomfort at the work place. Visual acuity is reduced when the lighting level is not adapted to the various tasks performed. Steelcase task lights **provide solutions to enhance the lighting level** for the needs of the individual. 20% of Europeans suffer from eyestrain every day (IPSOS for Steelcase International, 2007).

B7212

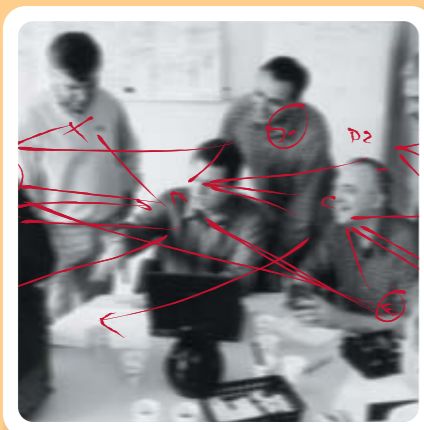

Technology, more than anything else, defines today's workstyles – from how we actually do our jobs to the size and shape of our workstations and even the amount of time we spend there. The essential issue is how we integrate technology tools and connections within our personal workspace so that we can work ergonomically and effectively. That's where Worktools can help, with a range of solutions designed for the new world of work.

Times change. As technology changes and progresses, it continues to transform the design of the workstation. These days, technology tools are much more compact. We increasingly use flat screen displays and laptops to do our knowledge work, which require less desk space but at the same time put different demands on the workstation. The key is to ensure that **technology tools are integrated with our workspace in a way that is ergonomic**, space-saving and highly flexible, and that we can easily connect with power, data and communication networks whenever we need to, either as nomadic workers or on a more permanent basis.

Integrating technology at your workstation. With Worktools, you have all the right solutions for integrating technology at your workstation – from a variety of CPU supports and monitor arms to our convenient Steelcase Connecting Hub and desktop access system. **Everything to help you have a better day at work.**

Product overview

Comfort

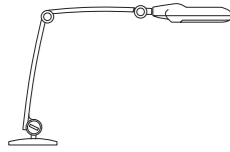

Flat Panel Display Arm

Ergonomic adjustment, space optimisation, shared use.

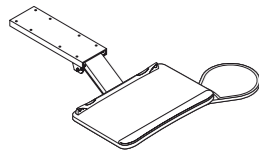

Laptop Support

Improves the ergonomics of mobile laptop computer users, it is all about adjustment of position.

Lighting

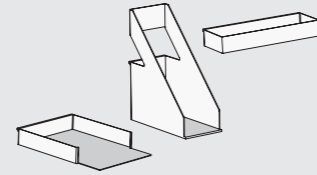

Lighting levels need to be adapted to the various tasks performed at the workstation.

Keyboard Support

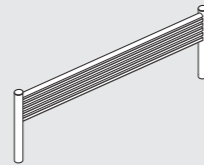

Adjustable keyboard supports allow the right height and right angle to prevent tendon or nerve discomfort.

Organisation

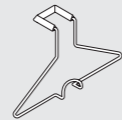

1+1 Letter tray across, Binder holder, Toolbox

The files and stationeries you use daily are within easy reach.

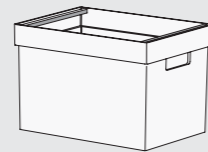

Third level

Using third level in order to access easily documents and save on floor space.

Flat Top Hanger

For convenient storage of your coat or jacket.

1+1 Box

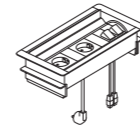

It's good storage, both for the things you use every day and the things you need to store for longer periods.

Technology

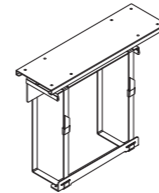

Steelcase Connecting Hub

Allows easy and above desk connection access to plug in equipment. Available fixings: Slatwall or clamp, bracket for Forward (Bridge).

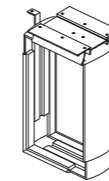

In & Out

Desk integrated solution. Allows easy and above desk connection access to plug in equipment.

Vertical Processor Sling

The solution for flexibility. Efficiently uses space under the work surface. Allows CPU to slide in and out, swivels completely to allow for cable access.

Profile CPU Support

The solution for security. The CPU is protected from theft and accidental damage. Valuable work surface space is regained for a better organisation of the work area.
